

La nueva Norma Lumínica

establece distintos tipos de alumbrado exterior, ¡descubre cuáles son sus funciones y aplicaciones!

PARTE

2

A photograph of an industrial facility at night. The scene is dominated by two tall, cylindrical smokestacks. The one on the left is illuminated with several bright, white lights. The one on the right is also illuminated, with a large, bright orange flame or fire visible at its base. In the foreground, there are various industrial structures, including pipes, valves, and a large blue corrugated metal building. The background is dark, with some distant lights visible. The overall atmosphere is industrial and brightly lit.

El alumbrado industrial es el que está destinado a iluminar áreas de actividad productiva, como fábricas y zonas industriales.

**El alumbrado deportivo
y recreacional ilumina
áreas donde se realizan
actividades deportivas,
como estadios, pistas, y
multicanchas de barrio.**

**El alumbrado
publicitario ilumina
avisos y letreros
para propósitos
comerciales o de
servicio, atrayendo
la atención del
público.**
